Watch Your Thirty Feet of Bowels!

OU have thirty feet of Intestines! What makes food travel through them? A set of Muscles that line the walls of these Intestines or Bowels.

When a piece of Food rubs the waits of the Intestines these Muscles tighten behind it, and thus it starts a Muscle-way which drives it through the whole length

It should take about 12 hours to do this properly, so that nutritious parts of the food may have time to be digested and absorbed.
